

PX Combi 836 Planting monitor

Use

The monitor is generally used for planting including trees. Based on a user input regarding the desired distance between the plants the monitor gives a signal when the next plant has to be set. The signal is given through an external speaker. The speaker can give two different signals when planting two rows simultaneously.

Functions

- Measures distance
- Built-in acoustic alarms - 2 sounds
- Partial amount of plants
- Total amount of plants
- Connected to external speaker

Installation

The monitor is installed in the cabin with the fittings included. Installation guidelines for magnets and sensors are included.
